Languages

Java 100.0%

Ignore this - it's where i put the student.java and main.java before i changed it

This is the initial project info, like our pseudo code and rubric

This folder contains folders with our names on it, where you can store your work,

These files are where we will store our final project as code

 **Fwavve** Code i have but i need VARIABLES cff01ac · 32 minutes ago 29 Commits

FinalProject	Create .gitkeep	
InitialProjectInfo	Delete InitialProjectInfo/.gitkeep	3 days ago
PeopleWorkFolders	Code i have but i need VARIABLES	32 minutes ago
Student.java	sync	2 days ago
main.java	day2 commit	2 days ago

If you click this folder,

CSA-project1-term3 / InitialProjectInfo /

 RED-40-max Delete InitialProjectInfo/.gitkeep f06e937 · 3 days ago History

Name	Last commit message	Last commit date
..		
PseudocodeBreakdown (1).pdf	PseudoCode breakdown upload	3 days ago
Rubric.pdf	adding rubric to this file	3 days ago

You'll end up on this page, where the rubric and pseudo code is located

If you click your this button

You can create file, where you have to name it .java so it registers as a java file - you can use this to copy and paste code

t Add file

- + Create new file
- ⬆ Upload files

If you upload files, upload a .java file

After you put in your files, press the green button called 'commit changes'. It will ask you to 'commit changes' - just put a random message, select commit directly to main branch and press commit changes again. This is similar to saving a file that's been edited, a commit records changes to one or more files in your branch.

On ipad

Good luck lol

Jk it's literally the same process, you go into a file, press the 'add file button' and commit it,
